*Bsc in Computer Science and Engineering.*                        *Jan-2020 – Dec-2023*
CGPA- 3.35 out of 4.00

**Women's Model College.**                                               Sylhet, Bangladesh
*HSC- Science*                                                        *Jun-2016–Jul-2018*
GPA- 4.33 out of 5.00

**Somuj Ali high school and College.**                              Sunamganj, Bangladesh
*SSC-Science*                                                        *Jan-2014–May-2016*
GPA- 4.50 out of 5.00

## PROJECTS

**Project 1**                            *Tidy Meal Master*                        Source Code

- This project entitled "Tidy Meal Master" is a dynamic web-based meal management platform to manage hostel or mess, calculate daily meal rate, deposit money, total cost, extra cost, and due money.
- Designed and developed a clean and modern website using **Html, CSS, PHP, JavaScript Bootstrap, jQuery and MySql.**

**Project 2**                                   *Storekeeper*                                   Source Code

- Developed 'Storekeeper,' a Laravel-based inventory management system. The system enables product entry with dynamic quantity updates upon sales and allows price adjustments by a syndicate consultant. It includes a dashboard displaying sales data (today, yesterday, this month, and last month) and a transaction history page.
- Use **Html, CSS, Php, Laravel, Bootstrap and Blade.**

**Project 3**                            *Tiki-online-ticketing-system*                            Source Code

- Developed an online bus ticketing system using Laravel (MVC), allowing users to select trips, check seat availability, and book tickets. Implemented forms for booking, trip management, and seat allocation with a database structure including user, trip, and seat tables.
- Use **Html, CSS, Php, Laravel, Bootstrap and Blade.**

**Project 4**                                *Meal Management*                                Source Code

- Developed a user-friendly digital system to manage meals, daily expenses, and deposits using Java for the backend and XML for frontend design. Integrated Firebase for real-time data storage and user authentication. The app allows users to join via a code, and managers can register by fulfilling specific requirements.
- Platform **Android**

**Project 5**                          *Employee Management System*                          Source Code

- An Employee Management System (EMS) streamlines employee data management and company workflows, saving time and reducing manual errors. It securely stores personal and professional employee details, aiding legal compliance and improving HR efficiency. EMS boosts productivity, accuracy, and profitability while lowering costs, making it essential for managing remote workforce.
- Using **Java, Java Swing and MySql.**

**Project 6**                             *Quiz and Gpa Management*                             Source Code

- The Quiz and GPA Management System, developed in Java using IntelliJ IDEA, features a simple GUI for quiz-taking and GPA calculation. Teachers can add questions in various categories, and students can take exams and receive immediate scores. It also includes a GPA calculator for users to calculate their Grade Point Average.
- Using **Java, Java Swing.**
